The above automated forex systems have consistently ranked high throughout independent forex system testing services. Each of these systems targets a particular behaviour in the currency markets.

Automated forex trading systems can make a lot of money if you're using the right broker, use at least several different systems and don't over leverage your account.

Most professional automated forex traders use between 4-8 different systems and never risk more than 1% of their account on any trade, and if one system doesn't make a profit at the end of the month they drop it, profitable trading is all about making heaps of small trades with an edge.

[Trading Point](#) is a good forex broker for your automated systems as they guarantee no re-quotes, which means your trade executes at the same time and the same price when the signal was generated, a critical feature to making consistent profits with forex robots.

If you can't leave your computer on all day, you should invest in a [Forex VPS](#), it's very easy to setup and you don't have to worry about computer or Internet outages.
